Our modular recyclers can be built with a wide range of panel materials to coordinate with your decor. Here are a few examples. Contact us to discuss the material you would like to work with.

Our stock panel material includes 4 types of solid tropical hardwood and 5 colors of 100% recycled plastic lumber (extruded HDPE). We can also use custom resin panels by 3Form that incorporate grasses, reeds, fabrics, and recycled glass, decorative aluminum panels by Moz Designs, textured or perforated Stainless Steel panels, slate or marble panels, and changeable graphics. We may be able to incorporate materials from your projects.
